1.1.2

Bugfix:

The issue color was not updated, while the issue was hidden from the board, by quick filters and got a different color.

1.1.1

Bugfix in Jira Version 8.0.X . Issues got colorized with a black background, caused by a missing grabber color.

1.1.0

Optimizations:

- Javascript improvements to speed up performance
- Issues are now immediately colored as they are loaded into the board

Fixed a bug where issues were not colored after the page was loaded. The reason for this was that the plug-in did not find the board.

1.0.7

Improved Java Script and ensure version compability

1.0.6

Ensured Version compability and fixed Front-End errors in version 7.0.0 .

1.0.5

Improvement of JQL functionality and ensured versions compability

1.0.4

improved the validation of users with permission to edit the board

1.0.3

fixed the bug, which caused a full color mode for all cards constantly, when rearranging the cards on the board, even if the mode was deactivated.

1.0.2

Fixed inability to edit or change the names of quick filters in the board configuration

1.0.1

Changed the toggles from the aui-version to an html/css version, since the aui bundle in JIRA is not always the same and some of them misses the toggle resource.
